CONTENTS

Keynote Lectures

Complex Dynamics Of Pendula Systems For Energy Harvesting ..................................................... Guanrong Chen
Dynamical Systems And Complex Networks: Are Such Theories Useful For Neuroscience And Earth Sciences? ........ ................................................................. Juergen Kurths
Dynamics Of Firing Oscillations And Spatiotemporal Behaviors In Biological Neuronal Networks .................. Qishao Lu
Group Delay Induced Instabilities And Bifurcations Of Controlled Mechanical Systems .......................... Haiyan Hu
Hidden Oscillations In Dynamical Systems ............................................................................... Gennady A. Leonov
Hybrid Systems Control Of Prostate Cancer ........................................................................................... Kazuyuki Aihara
Optimal Design Of Deformable Multibody Systems With Applications To Vehicles And Deployable Structures ................................................................. Jorge Ambrósio
Origin Of Chaos Research In Asia .............................................................................................. Yoshisuke Ueda
Pinning Control Of Complex Network Synchronization ............................................................................ Marian Wiercigroch
Recent Advances in Geometric Mechanics ............................................................................................ Manuel de León
Structural Control: Some Fruitful Research Areas ................................................................................... T.T. Soong

Mini-Symposia

Fractional Dynamics and Control

A NOVEL HYPERCHAOTIC ATTRACTOR AND ITS PROJECTIVE SYNCHRONIZATION .......................... ChengYou Bao, AiBin Jia
A SURVEY ON FREQUENCY-DEPENDENT DISSIPATION OF SOFT MATTER VIBRATION AND ACOUSTICS ................................................................. X.D. Zhang, Wen Chen
ABOUT FRACTIONAL PAIS-UHLENBECK FOURTH ORDER OSCILLATOR ........................................ D. Baleanu
AN IMPLICIT NUMERICAL METHOD FOR TWO VARIABLE-ORDER MODIFIED ANOMALOUS SUBDIFFUSION EQUATION WITH A NONLINEAR SOURCE TERM ........................................ F. Liu, S. Shen
Anomalous diffusion in a half plane with continuous source and sink at each half of the boundary ............ Xicheng Li, Wen Chen

CHAOS OF VISCOELASTIC ARCH MODELED BY NONLINEAR FRACTIONAL DIFFERENTIAL CONSTITUTIVE LAW .......................................................... Wei Zhang, Fan Huang, Bai-hua Li, Wan-lin Deng
Dynamic behaviors of a fractional order viscoelastic two-member truss system.......................... Yuan-ping Li, Wei Zhang
FINITE ELEMENT ANALYSIS FOR THE TRANSIENT DYNAMIC OF VISCOELASTIC GRUBLAYERS BEAM INVOLVING FRACTIONAL DERIVATIVE MODELS ............................................... N. Chen, H. Ying
FINITE ELEMENT APPROXIMATIONS OF THE FRACTIONAL CABLE EQUATION .................................. P. Zhuang, F. Liu

Fractional calculus in linear viscoelasticity ................................................................................................ Francesco Mainardi
FRACTIONAL DIFFERENTIAL EQUATION AND CONTINUOUS TIME RANDOM WALK IN ANOMALOUS DIFFUSION MODELING ........................................ H.G. SUN, Wen Chen, YangQuan Chen
HYBRID SYNCHRONIZATION OF CHAOTIC FRACTIONAL ORDER SYSTEMS WITH DIFFERENT DIMENSIONS ........................................................................... S. Wang, Yongguang Yu, M. Dao
MESHFREE METHOD FOR MATERIALS WITH FRACTIONAL-ORDER DERIVATIVE CONSTITUTIVE MODELS ............................................................................ M.L. Du, Z.H. Wang
NONLINEAR DYNAMIC ANALYSIS OF RUB-IMPACT ROTOR WITH FRACTIONAL ORDER DAMPING ...
Neurodynamics: Theory, Computation and Applications

A MODIFIED MODEL OF NEURONS IN APYLSIA CALIFORNICA THAT ACTIVATE INKING ................................................................. X.Y. Meng, Qishao Lu, J. Rinzel

Adaptive complete and inverse synchronization of hyper-chaotic Chen systems ..................................................................................... L.J. Pei

BURSTING INDUCED BY EXCITATORY SYNAPTIC COUPLING IN THE PRE-BÖTZINGER COMPLEX .......................................................... L.X. Duan, D.H. Zai, Qishao Lu

Chaotic control of Hindmarsh-Rose neural networks of all-to-all connection with the nonlinear time delay coupling function .......................................................................................................................... Hong-Jie Yu, Yu-Li Yan

COMPLEX FIRING PATTERNS PRODUCED BY CALCIUM CONCENTRATION IN A CHAY MODEL ............................................................. F. Zhang, Qishao Lu, Wei Zhang

CURRENT AND CONDUCTANCE NOISE EFFECTS IN MODEL NEURON .............................................................................................. Wuyin Jin, Ruicheng Feng, Hans A. Braun

DEGREE OF EXCITEMENT AND SYNCHRONIZATION OF CHEMICALLY COUPLED SMALL-WORLD NEURONAL NETWORKS WITH UPDATED WEIGHTS ........................................... F. Han, Qishao Lu, J.A. Fang, Z.J. Wang

DESYNCHRONIZATION IN UNCERTAIN COUPLED MULTI-NEURONS BY MIX-ADAPTIVE FEEDBACK CONTROL ............................................................................................................ Y. Zhao, Qishao Lu

DYNAMICAL EFFECT OF CALCIUM LEAK ON BURSTING OSCILLATIONS IN A MODEL WITH IP3 DEGRADATION ........................................ Meng Pan, Qishao Lu

DYNAMICS OF ELECTRICAL BURSTING PATTERNS FOR PANCREATIC β-CELLS WITH TWO SLOW K+ CURRENTS CONTROLLED BY SUBSPACE CA2+ AND CA2+-BASED NUCLEOTIDE OSCILLATION .................... Z.Q. Yang, Qishao Lu

Firing Behavior Control of Olfactory Model Aided with Washout-filter .................................................................................. Y. Du, R.B. Wang

Maximum Likelihood Decoding of Neuronal Inputs from an Interspike Interval Distribution ............................................................................. X.J. Zhang, G.Q. You, T.P. Chen, J.F. Feng

ROUTE TO ALMOST COMPLETE SYNCHRONIZATION VIA PHASE SYNCHRONIZATION IN TWO COUPLED BURSTING NEURONS WITH THEORETICAL AND NUMERICAL ANALYSIS ........................................ H.X. Wang

STUDY THE SPATIOTEMPORAL DYNAMICS OF NETWORKS OF H-H NEURONS WITHIN REGULAR
Dynamics and Control of Complex Networks in Aeronautics and Astronautics

CONSENSUS PROBLEM IN DELAYED NETWORKS OF DYNAMIC MULTI-AGENTS WITH IMPULSIVE EFFECTS ................................................................. Q.J. Wu, J. Zhou, S. Cheng

COORDINATED MOTION CONTROL FOR FORMATION MISSIONS VIEWED FROM SYMMETRIES AND ELATIVE EQUILIBRIA ................................................................. F. Wu, Z.Y. Geng

Flow pattern identification of inclined oil-water two-phase flow based on visual graph network method ............... Tingting Zhou, Zhongke Gao, Ningde Jin

FURTHER RESULTS ON DISTRIBUTED ATTITUDE SYNCHRONIZATION OF MULTIPLE SPACECRAFTS ........................................................................................................ Z.K. Li, Z.S. Duan

HYBRID POSITION AND FORCE CONTROL FOR DUAL-ARM SPACE ROBOT WITH CLOSED-CHAIN BASED ON FUZZY VARIABLE SLIDING-MOLE ......................................... Zhihuang Chen, Li Chen

Invariant manifolds and generalized chaotic synchronization ................................................................ L.J. Pei

NONLINEAR RESPONSE AND CONTROL OF A ROBOT ARM HAVING PRISMATIC JOINT .............................. Barun Pratiher

PLANNING AND CONTROL OF 3-DIMENSIONAL MULTI-AGENT FORMATION ................................................ Yongguang Yu, Guoguang Wen

Vibration and Nonlinear Dynamics of Continuous Systems

A CHAOIZED DC MOTOR MIXER BASED ON CHUA’S CIRCUIT .................................................. S. Şahin, C. Güzeliş

A STUDY OF NEAR-HIGH-FREQUENCY VIBRATIONS OF COMPLEX BUILT-UP STRUCTURES ....................... L. Ji

AN EXPERIMENTAL STUDY OF THE VIBRATIONAL RESPONSES OF A CLAMPED RIBBED PLATE ............... T.R. Lin, N.J. Kessissoglou

AN NEW SEMI-ANALYTICAL METHOD FOR FREE VIBRATION ANALYSIS OF ROTATIONAL SHELLS WITH VISCOELASTIC CORE ........................................................................... J. Lu, Y. Xiang, Qiao Ni

ANALYSIS OF BIFURCATION ON A JEFFCOTT ROTOR WITH COMPPLICATED WHIRLING BEHAVIORS ........... Z.W. Qian, L. Cheng

Analysis of nonlinear dynamic stability of composite laminates based on a new simple third-order shear deformation theory ......................................................................................... X.J. Lan, Z.H. Feng, G.Y. Shi

APPLY MODIFIED PROJECTIVE SYNCHRONIZATION TO NONLINEAR VIBRATION ISOLATION SYSTEM .................................................. Qianghong Zeng, Shijian Zhu, Jinjun Lou, Xing Zhang

BEND-BEND COUPLED OSCILLATION OF A TWO D.O.F. WIND TURBINE BLADE IN 1:2 INTERNAL
RESONANCE ..................................................................................................................... L. Li, Yinghui Li
BIFURCATION OF LIMIT CYCLES IN TWO PLANAR POLYNOMIAL SYSTEMS WITH PERTURBED TERMS .......................................................... Xiaochun Hong, Qinghua Qin
Bifurcations and Chaos of Composite Laminated Piezo-electric Rectangular Plate with One-to-One Internal Resonance .................................. Zhigang Yao, Wei Zhang, Xuanian Wei, Meng Zhang, Minghui Yao, Xiaoli Yang
BIFURCATIONS AND CHAOTIC MOTIONS OF A HONEYCOMB SANDWICH PLATE ................................................................. C.L. Liu, L.H. Chen, Wei Zhang
CHARACTERIZING THE ANTICIPATING CHAOTIC SYNCHRONIZATION OF RCL-SHUNTED JOSEPHSON JUNCTIONS .................................................. S.Y. Xu, Y. Yang
CLUSTERING OF HUYGENS' CLOCKS ............... K. Czolczynski, P. Perlikowski, A. Stefanski, T. Kapitaniak
DETERMINATION FOR THE EXACT RANGE OF THE VALUE OF THE PARAMETER CORRESPONDING TO CHAOS BASED ON THE SILNIKOV CRITERION .............................................. W.Y. Li
DIAGNOSING NONLINEAR CHARACTERISTICS OF DYNAMIC SYSTEMS WITH PERIODICITY RATIO .......................................................... L. Dai, L. Han
DISPLACEMENT-BASED DESIGN APPROACH FOR HIGHWAY BRIDGES WITH SMA ISOLATORS ............................................................... J.L. Liu, S. Zhu, Y.L. Xu
DYNAMIC RESPONSE OF A CANTILEVER BEAM VERTICALLY EXCITED BY A SHAKER DUE TO SLIGHT FREQUENCY EXCURSION ............................................... Z.H. Feng, X.J. Lan, X.D. Zhu, H. Lin
DYNAMIC STABILITY OF A SUDDENLY LOADED ARCH MODEL ............... Y.-L. Pi, M.A. Bradford, W.L. Qu
DYNAMICAL CAVITATION FOR INCOMPRESSIBLE HYPER-ELASTIC MATERIALS UNDER PERIODIC LOADING ............................................................... J.S. Ren, X.G. Yuan
DYNAMICS AND BIFURCATIONS OF A PARTIALLY FOLLOWER LOADED VISCOELASTIC BEAM ................................................................. J. Galán-Vioque, M.A. Lago, J. Valverde
Dynamics stability of simple supported shape memory alloy pipe conveying fluid ........................................................................ Zilong Zhang, Qiao Ni, Qin Qian, Lin Wang
ESTIMATION OF STATE DENSITIES OF GENERALIZED CHUA CIRCUITS USING B-SPLINES ................................................................. M. Güngör, F.A. Savacı
Exact Solutions for the Torsional Vibrations of Variable Cross-Section Isotropic Rods ................................................................. S. Jafari Mehrabadi, M. Rafiee, N. Rasekh-Saleh
FASTER FOURIER TRANSFORM FOR NATURAL FREQUENCIES OF AXIALLY MOVING BEAMS ................................................................. H. Ding, Li-Qun Chen
FAULT-TOLERANT CONTROL FOR STRUCTURAL NONLINEAR VIBRATION SYSTEMS WITH MULTI-CONSTRAINS ......................................................... J.L. Sun, Q.F. Teng, G.L. Wang, D.W. Fan
FIRST INTEGRAL AND FURTHER REDUCTION OF NORMAL FORMS .................................................. J. Li, X. Yuan, Z.L. Yang
Flexural Vibration in Honeycomb Plates with Locally Resonant Microstructures ........................................................................ G.L. Huang, X.N. Liu, R. Zhu, G.K. Hu
FREE VIBRATION ANALYSIS OF A BEAM-MASS SYSTEM UNDER DIFFERENT BOUNDARY CONDITIONS USING DYNAMIC STIFFNESS METHOD ........................................... H. Su, M. Zaid
FUZZY SLIDING-MODE CONTROL OF TRANSVERSE VIBRATION OF AXIALLY MOVING YARNS IN SIZING MACHINES ................................................................. H. Lin, Z.H. Feng, X.J. Lan
INVESTIGATION ON NONLINEAR COMBINATION RESONANCES FOR ORTHOTROPIC LAMINATED PLATES ................................................................. S.F. Lu, Wei Zhang, Y.D. Hu
LARGE AMPLITUDE VIBRATION AND MODAL INTERACTION OF SHALLOW SUSPENDED CABLE WITH MULTIPLE INTERNAL RESONANCES ......................... Lihanua Wang, Yueyu Zhao
Noise-induced erosion of safe basin in power system .......................................................... Du Qu Wei, Bo Zhang, Dong Yuan Qiu, Xiao Shu Luo, Wen Xun Xiao
NONLINEAR BEHAVIOR ANALYSIS OF A PLATE UNDER AERODYNAMIC LOAD ON THE APPROXIMATE INERTIAL MANIFOLDS ................................................................. Guanhua Mei, Jiazhong Zhang
NONLINEAR DYNAMIC RESPONSE OF FUNCTIONALLY GRADED SHELL PANELS WITH IMPERFECTIONS IN THERMAL ENVIRONMENTS ....................................................... S. Pradyumna, N. Nanda
NONLINEAR DYNAMICS OF COMPOSITE LAMINATED CANTILEVER PLATE .......................................................... M.H. Zhao, Wei Zhang
NONLINEAR RESONANCES OF ORTHOTROPIC LAMINATED COMPOSITE PLATES ............................................................................................................................... Y.D. Hu, S.F. Lu, G.J. Du
Nonlinear Waves and Their Chaotic Behavior in Large-Deflection Beam ........................................................... Yiqing Zhou, Zhifang Liu, Shanyuan Zhang
NON-STATIONARY RANDOM VIBRATION ANALYSIS OF PLATES WITH RANDOM PARAMETERS .......................................................... J. Dai, W. Gao, J. Ma
ON THE CLASSICAL FINITE BOGDANOV-TAKENS NORMAL FORMS .................................................. Y.T. Liu, B. He, J. Li
On the Strange Behaviour of Young’s Modulus for Tensile Analysis of A Nanorod/Nanotube based on Nonlocal Elasticity Theory ............................................................................................................. C.W. Lim
PASSAGE THROUGH RESONANCE OF DYNAMICALLY UNBALANCED ROTOR EQUIPPED BY THE ONE-PLANE BALL AUTOBALANCING MECHANISM ................................................................ V.G. Bykov
PATTERN FORMATION DRIVEN BY CROSS-DIFFUSION IN A TWO DIMENSIONAL DOMAIN ............................................................................................................. G. Gambino, M.C. Lombardo, M. Sammartino
PREDICTION AND SIMULATION OF STOCHASTIC RESONANCE IN A NOISY WEAK DAMPED BISTABLE COUPLED SYSTEM .............................................................................. M. Wang, Y.M. Kang
Resonances for the SD oscillator with Vibrating Base ........................................................................ Qingjie Cao, Xianghong Li, Ruifan Tian
RIGID-FLEXIBLE COUPLING DYNAMICS OF EXTENDABLE FLEXIBLE STRUCTURE UNDERGOING LARGE OVERALL MOTION ............................................................................. Z.Y. Liu, J.Z. Hong, J.Y. Liu
SADDLE-NODE BIFURCATION CONTROL OF A SPRING PENDULUM WITH SINGLE-FREQUENCY EXCITATION ................................................................................. H. Xiao, C.X. Liang, J.S. Tang
SATURATION CONTROL OF A NON-IDEAL HINGED-HINGED BEAM USING AN ELECTRICAL CIRCUIT WITH VARIABLE CAPACITY ....................................................................... A.A. Naha Djanan, B.R. Nana Nendjo, P. Woofo
STABILITY ANALYSIS OF A HELICAL ROD BASED ON EXACT COSSEBERT MODEL ....................... Y.Z. Liu
STRONGLY NONLINEAR SIMPLE PENDULUM ANALYSIS USING AN INITIAL-VALUE TRANSFORMATION APPROACH .................................................................................................. T. Li, Y.S. Li, S.J. Li, X.Y. Li
SUSTAINED CHAOTIC VIBRATIONS USING A CANTILEVER BEAM WITH BASE EXCITATION AND NONLINEAR BOUNDARY CONDITIONS AT TWO POINTS ALONG ITS LENGTH ........................................................................................................ Prasanna S. Gandhi, Anish Joshi
Synchronization and anti-synchronization of dynamical system by coupling of velocity .......................................................... Weiyang Qin, Tao Sun, Zhaohui Kang, Xingmin Ren
SYNCHRONIZATION DYNAMICS FOR A CLASS OF NETWORKED MASS-SPRING-DAMPER OSCILLATORS SYSTEMS .................................................................................................. S. Cheng, J. Zhou, Q.J. Wu
The Chaotic Motion of an Elastic Cylindrical Shell Subjected to Transversal Perturbation in Axial Compression .......................................................... Shanyuan Zhang, Tao Zhang
THE DYNAMIC MUTATION CHARACTERISTICS OF THERMONUCLEAR REACTION IN TOKAMAK ................................................................................................................. J. Li, Z.Z. Liu, W. Deng, Wei Zhang
Vibration Analysis of damping composite laminated structure based on layered shear model in thermal field ............................................................................................................. W. Liang, L.L. Yang
Vibration of spherical shells ................................................................................................. Q. Dong, B.Y. Hu
VISCOUS LINEAR INSTABILITY OF AN INCOMPRESSIBLE ROUND JET WITH PETROV GALERKIN
SPECTRAL METHOD ............................................................................................................... M.L. Xie

Monitoring and Maintenance-Oriented Control of Dynamical Engineering
Systems and Structure
A NEW ENCAPSULATION OF WORKING FLUID THERMODYNAMIC PROPERTIES COMPUTATION
EMPLOYED FOR THE TURBO MACHINERY THERMAL PERFORMANCE EVALUATION AND
A TEST PLATFORM FOR STRUCTURAL HEALTH MONITORING OF LONG SUSPENSION BRIDGES ......
.................................................................................................................... Y.L. Xu, S. Zhan, X.H. Zhang, X.J. Hong, L.D. Zhu, Y. Xia
ACTIVE VIBRATION CONTROL ANALYSIS OF LOW ORDER MODES OF A DISTRIBUTED STRUCTURE
WITH COMPLEX EXCITATIONS .............................................................. M.Q. Shao
APPROXIMATE SOLUTION OF NAVIER-STOKES EQUATION FOR VISCOUS FLOW OF
FLOATING-RING BEARING ............................................................................ Z. Wang, Xingmin Ren, Zhaohui Kang
CONSIDERATIONS REGARDING THE BEHAVIOR OF DAMAGED STRUCTURES .........................
................................................................................................................... G.R. Gillich, D. Amariei, E.D. Birdeanu, V. Iancu
CONSTRAINT BIFURCATION ON SYNCHRONOUS FULL ANNULAR RUB OF NONLINEAR ROTOR
SYSTEM .................................................................................................................. H.B. Zhang, Yushu Chen
DETECTION AND DIAGNOSIS OF MODEL PARAMETER AND VARIANCE CHANGES USING SLIDING
WINDOWS APPROACH .............................................................................. Th.D. Popescu
DETECTION OF LONG DISTANCE PROPAGATION AND VARIOUS DAMAGES BASED ON
PIEZOCERAMIC FOR THE CRACKED C-CHANNEL STRUCTURES .........................
.............................................................................................................................. Yong Hong, Jae Wan Lee, Dong Yoon Kim, Dong Pyo Hong
DEVELOPMENT OF WEAR-ESTIMATION TECHNIQUES FOR INTEGRATION INTO MONITORING AND
SUPERVISION CONCEPTS ........................................................................ K.-U. Dettmann, Dirk Söffker
Dynamic parameter identification using laser doppler vibrometer for ultrasonic vibration assistant milling ........
................................................................................................................................. Ko Jeong Hoon, Song Yun Feng, Shaw Kah Chuan
FREQUENCY MICRO-VARIATION DETECTION BASED ON DUFFING OSCILLATOR’S
CHARACTERISTICS OF INTERMITTENT CHAOTIC ...................................... Xiao-lu Guo, Bo Zhang, Dong-yuan Qiu
IDENTIFICATION OF NONLINEAR STRUCTURAL SYSTEMS UNDER LIMITED IMPUT AND OUTPUT
MEASUREMENTS ................................................................. Y. Lei, T. Li, Ch. Liu
IDENTIFICATION OF BOUNDARY CONDITION PARAMETERS OF TAPERED BEAM-LIKE
STRUCTURES USING NATURAL FREQUENCIES ............................................. L. Wang, Zhichun Yang
INTEGRATED RELIABILITY ASSESSMENT METHOD WITH SYSTEM IDENTIFICATON FOR
STOCHASTIC STRUCTURES...........................................................................................................
................................................................................................................. J. Zhang, Y.L. Xu, Jie Li
MATERIAL DAMPING TEST OF HIGH TEMPERATURE ALLOY .............................................
.......................................................................................................................... Bin Li, Jinpeng Wen, Zhichun Yang, Jinli Liu
Modeling and identification of bolted joints dynamic ..................................................... Morteza Iranzad, Hamid Ahmadi
NEW OPTIMIZED ALGORITHMS FOR THE MODELING, SIMULATION AND CONTROL OF AN
UNDERMANNED UNMANNED VEHICLE .......................................................... R.M. Botez
NONLINEAR SYSTEM IDENTIFICATION/MONITORING BY ADVANCED TIME-FREQUENCY ANALYSIS
................................................................................................. P.F. Pai
On the Optimization Problem of Model-based Monitoring ........................................... L. Ginzinger, M.N. Sahinkaya, B. Heckmann, P. Keogh, Heinz Ulbrich
RESEARCH OF CURRENT SHARING BASED ON CHAOTIC SYNCHRONIZATION IN PARALLELED
Advanced Control Technologies for Aeroelastic Systems and Relevant Applications in Aerospace Engineering

ACTIVE CONTROL ON LANDING GEAR SHIMMY WITH BIFURCATION THEORIES ............................................. D.W. Chen, H.B. Gu, H. Liu

ANALYSIS OF NONLINEAR SLOSHING IN SPHERICAL CONTAINER ................................................................. J. Lu, J.F. Li, Tianshu Wang

Attitude Dynamics of Short Tethered Sub-satellite in Deployment Period ....................................................... Y.Y. Liu, J. Zhou

BIFURCATION CONTROL AND CONSTRAINED STABILIZABILITY OF AEROELASTIC OSCILLATIONS . M. Demenkov

CONTROL OF HIGH FREQUENCY COMBUSTION VIBRATIONS WITH INJECTOR BAFFLE IN LIQUID ROCKET ENGINE ......................................................... S.J. Feng, Y.F. Cheng, W.S. Nie, F.C. Zhuang

Design and optimization of viscoelastic damping system of a payload rack in spacecraft ...............................
Dynamics and Control of Time-delay Systems

A Low-Pass Filter Based Continuous Time Approximation of Time Delay Systems

Bo Song, J.Q. Sun

AN EFFICIENT METHOD FOR STUDYING WEAK RESONANT DOUBLE HOPF BIFURCATION IN DELAY DIFFERENTIAL EQUATIONS

K.W. Chung, J. Xu

BIFURCATION ANALYSIS OF A NEURAL NETWORK WITH TIME DELAYS

Xiaochen Mao

Bifurcation Control Based on Van der Pol System with Delay

Chuan-bo Ren, Zhen Zhao, Lin Sun

Bifurcation Control of Duffing System with Delay

Chuan-bo Ren, Zhen Zhao, Lin Sun

DYNAMICS OF A DELAYED NETWORK WITH SMALL WORLD CONNECTION

X. Xu, J.W. Luo, R. Fu

ENERGY TRANSMISSION IN TWO NON-LINEARLY DELAY COUPLED AND PARAMETRICALLY EXCITED VAN DER POL OSCILLATORS

J. Xu, X.T. Sun

First-passage failure of harmonically and stochastically excited strongly nonlinear oscillators with time-delayed feedback control

Changshui Feng, Weiqiu Zhu

GLOBAL DYNAMICS OF A CUBIC STRONGLY NONLINEAR AUTONOMOUS OSCILLATOR WITH TIME-DELAYED ACCELERATION FEEDBACK

Li. Zhang, H.L. Wang, Haiyan Hu

IMPROVED NONLINEAR FEEDBACK CONTROL FOR FREE-FLOATING SPACE MANIPULATOR WITH TIME DELAYS TO TRACK DESIRED TRAJECTORY IN JOINT SPACE

J. Liang, Li Chen

ROBUST CONTROL OF A FLEXIBLE CANTILEVER PLATE WITH CONSIDERING UNCERTAIN TIME DELAY

L.X. Chen, G.P. Cai

Robust control of unstable SDOF system with uncertain parameters

J.Y. Li, Z.H. Wang

STABILITY ANALYSIS OF ACTIVE CONTROL SYSTEM WITH TIME DELAY

Q. Sun, X.H. Wu, X.M. Xue, P. Li

STABILITY AND BIFURCATION ANALYSIS FOR NONLINEAR DESCRIPTOR SYSTEM WITH TIME DELAY AND APPLICATION TO NEUTRAL DIFFERENTIAL SYSTEM

Xiaofeng Liao, Chuandong Li

THE VIBRATION SUPPRESSION OF A DELAYED FEEDBACK CONTROL DYNAMICAL VIBRATION ABSORBER

Y.Y. Zhao, J. Xu, Z.G. Yan

TWO-PARAMETER BURSTING BEHAVIOURS IN A TIME DELAY NEURAL NETWORK

Z.G. Song, J. Xu

TWO-TO-ONE RESONANT HOPE-HOPF BIFURCATIONS IN A NONLINEAR OSCILLATOR INVOLVING TIME DELAYS

J.C. Ji, N. Zhang

Kinetics, Control and Vibrorheology

DISSIPATION-FLUCTUATION RELATION AND SPECTRAL DENSITY OF SUBDIFFUSIVE FRACTIONAL SMOLUCHOWSKI SYSTEMS

Y.M. Kang, Y.L. Jiang, Jun Jiang

NONLINEAR DYNAMICS OF ICED SUSPENDED CABLES
THE RESPONSE OF A COMPLEX STOCHASTICALLY DYNAMICAL SYSTEM WITH POISSON EXCITATION ................................................................. Wei Li, Jiaorui Li, Weisheng Chen
TRIGGER OF COUPLED SINGULARITIES IN DYNAMICS OF A HEAVY MATERIAL PARTICLE ALONG ROTATED ROUGH CIRCLE ........................................... Katica R. Hedrih

Dynamics and Oscillations in Biological Systems
A novel hybrid differential evolution algorithm for nonlinear constrained optimization problems .............................................. J.L. Chang, Xiao-Ping Ma
A Stable Dynamic System with Five Elements .............................................................. Yumin Zhang
BIFURCATION IN AN AGE-STRUCTURED HEMATOPOIETIC MODEL ......................................... Jinzhi Lei
Chaotic Vibration of the Wave Equation with a van der Pol Boundary Condition .................... Zhaosheng Feng
Classification of Airborne Hyperspectral Data Based on the Average Learning Subspace Method ........
................................................................................................................................................................. Hasi Bagan
COMPARING DIFFERENT ODE MODELLING APPROACHES FOR GENE REGULATORY NETWORKS ....
................................................................................................................................................................ A. Polynikis, S.J. Hogan, M. di Bernardo
COMPLEX DYNAMICS AND SCALAR FEEDBACK CONTROL IN A DISCRETE-TIME PREY-PREDATOR SYSTEM ........................................... N. Li, Q.L. Zhang, H.Y. Sun
Delay-Derivative-Dependent Stability for Delayed Neural Networks with Unbound Distributed Delay ..........
................................................................................................................................................................ Shumin Fei
Dynamics of a HIV-1 therapy model of fighting a virus with another virus ........................................ Xingfu Zou
DYNAMICS OF RHYTHMS IN THE CRAYFISH STOMATOPOASTOMAGASTRIC GANGLION ................
......................................................................................................................................................... Y.Y. Li, L. Zhang, L. Yuan, Minghao Yang, Zhiqiang Liu, C.L. Wei, Huaguang Gu, Wei Ren
Exact Solitary Wave and Quasi-Periodic Wave Solutions for Four Fifth-Order Nonlinear Wave Equations ........
................................................................................................................................................. Jibin Li
Extreme parameter sensitivity of transient persistence in spatially coupled ecological systems ................
............................................................................................................................................................. Lin Du, Y.-C. Lai, Wei Xu
Global Attractivity of a Nonlinear Delay Differential Equation with Application ................................ Chuanxi Qian
GLOBAL DYNAMICAL ANALYSIS OF HIV MODELS WITH TREATMENTS ..................... Liancheng Wang
Green Functions of a Class of Nonlinear Degenerate Operators and Application ........................ Shenzhou Zheng
Robust Exponential Stability of Neural Networks with Time-dependent Switching Dynamics ................
...................................................................................................................................................... Tingwen Huang, Zhigang Zeng
SPURIOUS LATTICE SOLITONS FOR LINEAR FINITE DIFFERENCE SCHEMES ...................... Claire David
STABLY DISSIPATIVE LOTKA-VOLTERA SYSTEMS: DYNAMICS AND CONTROL .................. Xiaohua Zhao
Synchronization for Arrays of Coupled Cohen-Grossberg Neural Networks with Delayed Couplings ........
....................................................................................................................................................... Shumin Fei
The affects of spiral breakup to the cardiac rhythm .......................................................... Shenquian Liu, Qi Jiang
Towards Solving Nonlinear Eigen Problems .............................................................................. Jianxin Zhou

Flight Dynamics and Control
A TEST EVALUATION OF A PILOT-INDUCED-OSCILLATION PREDICTION CRITERION .................
............................................................................................................................................................ J.Q. Liu, Zhenghong Gao
BIFURCATION ANALYSIS OF NEARLY NONSMOOTH OSCILLATIONS IN INPUT-CONSTRAINED FLIGHT CONTROL SYSTEMS ......................................... M. Demenkov, Z. Gong
DESIGN AND ANALYSIS OF COMBINED NONLINEAR DYNAMIC INVERSION AND $H_\infty$-BASED FLIGHT CONTROL LAWS ............................................. M.E. Sidoryuk, E.N. Kolesnikov, Y.M. Fan, M.G. Goman
FLAP-LAG STABILITY OF HELICOPTER ROTOR BLADES USING CONTINUATION AND BIFURCATION METHODS .......................... D. Rezgui, M.H. Lowenberg, P.C. Bunniss
MODELING AND CONTROL OF A MICRO FLAPPING WING ROTORCRAFT .................................................................
                                                                                                                    J. Lu, S. Guo, D. Li, N.J. Fan, Zheng-jie Wang
Modeling of Small Unmanned Aircraft with new configuration for Flight Control System Design .............................
                                                                                                                    Huanjin Wang
NONLINEAR AEROELASTIC ANALYSIS OF A MORPHING FLAP ................................................................. S. Guo, D. Li
RECONFIGURATION OF TETHERED SATELLITE FORMATIONS AT A COLLINEAR LIBRATION POINT ..
                                                                                                                    Z.Q. Cai, J. Zhao, Z.H. Qi
STUDIES ON NONLINEAR AEROELASTICITY OF TELESCOPING WING IN SUPersonic AIRFLOW ......
                                                                                                                    L. Sun, Wei Zhang, D.X. Cao, Minghui Yao
THE EFFECTS OF BRACINGS IN ELIMINATION OF VIBRATION LOCALIZATION IN MISTUNED BLADED-DISK ASSEMBLIES ..................................  D.Q. Cao, D. Wei, Y.L. Zhou
THE IMPACT OF THE ACTUATOR NON-LINEAR FACTORS ON THE FLIGHT DYNAMICS OF THE STATIC UNSTABLE AIRCRAFT WITH HIGH-GAIN FEEDBACKS .......................  Z. Gong, H.L. Shen
The Prediction of PIO Susceptibility of a Large Transport Aircraft ........................................ J.Q. Liu, Zhenghong Gao
TWO-STATE DYNAMIC GAIN SCHEDULING CONTROL APPLIED TO F16 AIRCRAFT MODEL ..................
                                                                                                                    W. Yang, M.N. Hammoudi, M.H. Lowenberg, G. Herrmann, X. Chen

Analytical Dynamics
A NEW ASYMPTOTIC PERTURBAITON METHOD FOR NONLINEAR OSCILLATORS ........................................
                                                                                                                    Hailiang Hu, Wei Zhang
ANALYZING DYNAMIC RESPONSE OF NONHOMOGENEOUS STRING FIXED AT BOTH ENDS ........
                                                                                                                    Weipeng Hu, S.M. Han, Zichen Deng, W. Fan
ANALYZING MOTION AND CONTROL AROUND EQUILIBRIUM POINT OF ASTEROID ........................................
                                                                                                                    Zhenjiang Zhang, Cui Hutaoc Cui
CARTAN-LEPAGE FORMS IN MECHANICS ........................................ D. Krupka, Olga Krupkova, D.J. Saunders
DEVELOPMENT OF SEISMIC ISOLATION TECHNIQUES FOR ELEVATED ROOF OF HI-TECH FACTORY BUILDING .................. W.P. Sung, M.H. Shih, C.H. Sui
DISCRETE GEOMETRIC MECHANICS AND H-infinite CONTROL METHODS WITH APPLICATIONS ...........
                                                                                                                    D.H. Shi, L.Y. Wang
DYNAMICS AND CONTROL OF SINGLE WHEEL VEHICLES ........................................... Yu.G. Martynyenko
FROLICHER-NIJENHUIS THEORY AND HELMHOLTZ CONDITIONS FOR THE INVERSE PROBLEM OF THE CALCULUS OF VARIATIONS ............................................. I. Bucataru
GEOMETRIC CALCULUS FOR SECOND-ORDER DIFFERENTIAL EQUATIONS AND GENERALIZATIONS OF THE INVERSE PROBLEM OF LAGRANGIAN MECHANICS ...................... Willy Sarlet
GLOBAL BIFURCATIONS AND MULTIPULSE CHAOTIC DYNAMICS FOR FUNCTIONALLY GRADED MATERIALS RECTANGULAR PLATE ........................................ S.B. Li, Wei Zhang, Y.X. Hao
INVERSE PROBLEM FOR CHAPLYGIN’S NONHOLONOMIC SYSTEMS ........................................ Y.X. Guo, C. Liu, S.X. Liu
Methods of Analytical Mechanics for Dynamics of an Exact Cosserat Elastic Rod .............................. Y. Xue, D.W. Weng
NEW DEVELOPMENTS IN HAMILTON-JACOBI THEORY ................................................. Manuel de León
Optimal control of deployment process of solar array on spacecraft using particle swarm optimization algorithm ......  Xinsheng Ge, Kai Sun
PERTURBATION TO SYMMETRIES AND ADIABATIC INVARIANTS OF GENERALIZED CLASSICAL MECHANICS .................................................. Y. Zhang

ANYLASIS ON THE DYNAMICAL PROPERTIES OF UNCERTAIN ROTOR SYSTEMS ................................................................. Jiejie Zhang, Bo Fang, Wen-Hu Huang
APPLICATION OF NONLINEAR GALERKIN METHOD IN CONTINUOUS ROTOR-BEAR-SEAL SYSTEM ................................................................. K.P. Zhang, Q. Ding
APPLICATION OF THE GENERALIZED GAUSSIAN PRICIPLE TO THE PROBLEM OF SUPPRESSION OF MECHANICAL SYSTEMS OSCILLATIONS ................................................................. Sh.Kh. Soltakhanov, M.P. Yushkov, S.A. Zegzhda
BRIDGE SEISMIC ASSESSMENT BASED ON PUSHOVER ANALYSIS ................................................................. Guangyu Wang, Baodong Liu, Pengfei Li

CHOICE OF PARAMETERS FOR GYROSCOPIC STABILIZER OF VIBROISOLATION SYSTEM ................................................................. J. Šklíba, J. Škoda, M. Sivčák
COMPARISON OF MACHINING STABILITY IN UP AND DOWN MILLING ................................................................. C.Y. Huang, J.J. Junz Wang

Correlation of Physical Properties with Mistuning Sensitivity through Frequency Veering for Tuned Bladed Disks ................................................................. Z.B. Zhao, E.M. He
Determination of Vibration Experimental Curves of Simulating Special Products Transportation with the improved Statistical Tolerance Induction Method ................................................................. G.N. Yao, H.Y. Huang, L.J. Wang, J.H. Wei, G.J. Sun

DYNAMIC ANALYSIS OF HYPERELASTIC AXISYMMETRIC SOLIDS BY P-TYPE MIXED FINITE ELEMENT METHOD ................................................................. M. Tanveer, Jean W. Zu

DYNAMIC INSTABILITY OF LAMINATED COMPOSITE PLATES WITH PIEZOELECTRIC ACTUATORS AND IN HYGROTHERMAL ENVIRONMENT ................................................................. S. Pradyumna, A. Gupta

Dynamic Response and Identification of A Cantilever Beam Supported by A Nonlinear Spring Subjected to A Moving Mass ................................................................. Kaiping Yu, Kai Yang
DYNAMICAL ANALYSIS ON A NONLINEAR HEAVY VEHICLE-PAVEMENT SYSTEM ................................................................. S.H. Li, S.P. Yang

FEEDBACK CONTROL OF NONLINEAR STOCHASTIC SYSTEMS FOR SHAPING THE STATIONARY PROBABILITY DENSITY ................................................................. C.X. Zhu, Weiqiu Zhu

First passage failure of Dynamical Power Systems under Random Perturbations ................................................................. Lincong Chen, Weiqiu Zhu

FRACTAL AND CHAOTIC DYNAMIC MODELS OF SEISMIC DISSIPATED ENERGY IN AN ENERGY SYSTEM OF SRC COMPOSITE STRUCTURES ................................................................. M. Xie, S.S. Zheng

FRACTAL BASIN BOUNDARIES AND CHAOTIC DYNAMICS IN ESCAPES FROM THE RANDOMLY-DRIVEN HENON-HEILES SYSTEM ................................................................................. C.B. Gan, Weiqiu Zhu

FULL SCALE MEASUREMENTS ON BUFFETING RESPONSE OF SUTONG BRIDGE DURING TYPHOON FUNG-WONG ................................................................. H. Wang, A.Q. Li, G.W. Zhao

Generalized Energy Index for evaluating railway track segment quality in a systematic manner ................................................................. Zhen Yang, S.M. Wang, Y.S. Fan

INFLUENCES OF EXTERNAL LOAD AND SUPPORTING STIFFNESS ON NONLINEAR BEHAVIOR OF FACE-GEAR TRANSMISSION SYSTEM ................................................................. Linzhao Liu, Weidong Wang, Zhiming Liang, Shanchao Sun

INVESTIGATION OF ROTOR INSTABILITY CAUSED BY RUBBING DUE TO SUDDENLY APPLIED UNBALANCE AND LARGE TRANSIENT AMPLITUDE ................................................................. Yatao Zhang
Left and Right Eigenvector Algorithm Applied to the Identification of Aerodynamic Derivatives of Bridge Model ................................................................. Xiaoxu Zhang, Lifen Chen, Hanwen Song

NATURAL FREQUENCIES AND MODEL FUNCTION OF TRANSVERSE VIBRATION OF AXIALLY MOVING BEAMS WITH UNSYMMETRICAL HYBRID SUPPORTS ................................................................. B. Li, H. Ding, Li-Qun Chen
NATURAL LOGARITHM-BASED SLIDING MODE CONTROL FOR ACTIVE ENGINE MOUNT .................................

Nonlinear dynamic analysis of elastic taut inclined cables ........................................ X.D. Zhou, S.Z. Yan, F.L. Chu
Nonlinear Dynamic Analysis of the Rotor/bearing/seal System ..............................................

NONLINEAR DYNAMICS AND BIFURCATIONS IN A HYBRID DYNAMICAL SYSTEM OF INFECTIOUS DISEASE ................................................. G. Tanaka, Kazuyuki Aihara
NONLINEAR DYNAMICS AND CONTROL OF A BRAKE SYSTEM ....................................................... S.S. Jia, Q. Ding
Nonlinear Dynamics Bond Graph Model for a Cylindrical Gear Pair System ..............................

Nonlinear dynamics in cantilevered pipe conveying pulsating fluid ...................................... Yan-Lei Zhang, Li-Qun Chen
NONLINEAR DYNAMICS OF A MEMS TURNING FORK GYROSCOPE .................................................

.................................................... Yu.G Martynenko, I.V. Merkuryev, V.V. Podalkov
NONLINEAR MODELING AND DYNAMIC BEHAVIOR RESEARCH ON MAIN DRIVE SYSTEM OF ROLLING MILL WITH INTERFACIAL FRICTION AND BACKLASH COUPLED .............................................. Z.Y. Gao, Y. Zang, D.P. Wu
NONLINEAR TRANSIENT FINITE ELEMENT ANALYSIS OF SMART STRUCTURES WITH DISTRIBUTED PIEZOELECTRIC CONTROL BASED ON REFINED STRUCTURAL MODELS ......................................................... R. Schmidt, T.D. Vu
NONLINEAR VIBRATION MECHANISM OF A LIQUID-ELASTIC SHELL COUPLED SYSTEM .................

............................................................................................................................................................... Dajun Wang, Chunyan Zhou
NONLINEAR PRINCIPLE PARAMETRIC RESONANCE OF AN AXIALLY MOVING BEAM CONSTITUTED BY THE STANDARD LINEAR SOLID MODEL ...................................................... B. Wang, Li-Qun Chen
NUMERICAL METHODS FOR DYNAMICAL MULTIBODY SYSTEMS WITH ROLLING RESISTANCE ..... J. Cao, Qi Wang, J. Lu

OPTIMAL CONTROL FOR NONLINEAR and CONTROL NON-AFFINE ROTOR-AMB SYSTEM ..................

............................................................................................................................................................... G.S. Tombul, S.P. Banks
PDF SOLUTION TO NONLINEAR SHIP ROLL MOTION EXCITED BY EXTERNAL POISSON WHITE NOISE ................................................................. H.T. Zhu, G.K. Er, V.P. Lu, K.P. Kou
PREDICTION CHATTER STABILITY AND BIFURCATION IN MILLING ...................................................

............................................................................................................................................................... D.M. Zhao, Q.C. Zhang, P. Liu
Probability-based seismic response analysis of near-field motions ........................................... Haiming Zhang, Wei Jian Yi
RELIABILITY DESIGN OF IMPELLER IN LARGE CENTRIFUGAL COMPRESSORS ..............................

............................................................................................................................................................... H. Ma, Wei Sun, B.C. Wen
RESEARCH ON RIGID-FLEXIBLE COUPLING DYNAMICS MODELING AND SIMULATION OF MAIN MOTION MECHANISM FOR NC MACHINE TOOL ......................................................... Wei Sun, B.C. Wen
Revisit of the Inverse Dynamics Problem for Flexible Manipulators ........................................... Marcelo Epstein, Qiao Sun
ROBUST VIBRATION CONTROL OF A SPACE TRUSS BASED ON RECEPTANCE MODIFICATION METHOD ......................................................... Yongwang Yun, Lifen Chen, Meiyan Zhang, Guoan Tang
SEISMIC RESPONSE OF TV TOWER CONTROLLED BY THE PIEZOELECTRIC FRICTION DAMPER ..... Weibing Hu, Haipin Yu

SLIDING BIFURCATIONS INDUCED BY DRY FRICTION IN 2DOF BRAKE SYSTEM ..............................

............................................................................................................................................................... S.Y. Chen, Jinyuan Tang
STABILITY IN PARAMETRIC RESONANCE OF IN-PLANE ACCELERATING VISCOELASTIC PLATES ....
STATE SPACE IDENTIFICATION METHOD FOR MODAL ANALYSIS ................................. B. Chen, Hanwen Song
Static shape control for ferroelectric cantilever beam based on a macroscopic differential model .................................
......................................................................................................................... Changquan Zhou, Changshui Feng, Linxiang Wang
Stationary response of Duffing oscillator with fractional derivative damping under bounded noise excitations ..........
......................................................................................................................... Fang Hu, Lincong Chen, Weiqiu Zhu
Stochastic averaging of strongly nonlinear oscillators subject to Poisson white noise excitations ................................. Y. Zeng, Weiqiu Zhu
STOCHASTIC HOPF BIFURCATION OF QUASI-INTEGRABLE HAMILTONIAN SYSTEMS WITH MULTI-TIME-DELAYED FEEDBACK CONTROL AND WIDE-BAND NOISE EXCITATIONS .................................
......................................................................................................................... Z.H. Liu, Weiqiu Zhu
Stochastic Response of the Nonlinear Axial Compression system ................................. Hong Yao, Tao Deng, Guang-Jun Zhang
Study of the Effect of Cubic Nonlinear Damping on Vibration Isolations Using Harmonic Balance Method ........................
STUDY OF WAVE FORCES INTERFERENCE ACTION MAIN GIRDERS OF TWIN-DECK BRIDGES .................................
......................................................................................................................... X.T. Zhang, A.R. Chen
STUDY ON EFFECT OF SURFACE FRICTION ON THE DYNAMIC BEHAVIORS OF SPUR GEAR PAIR ................................. Jinyuan Tang, Q.B. Wang, S.Y. Chen
Study on the Stability of TMD with Plastic Impact ................................................................. X.H. Li, A.Z. Yan
THE INFLUENCE OF IRREGULAR PAVEMENT ON VEHICLE-BRIDGE COUPLING VIBRATION RESPONSES OF CONCRETE BOX GIRDER BRIDGES WITH CORRUGATED STEEL WEBS ................................. Yingnan Xiao, Baodong Liu, Pengfei Li
THE INFLUENCE ANALYSIS OF MOISTURE CONTENT ON THE NATURAL VIBRATION CHARACTERISTICS OF CONCRETE PIER ................................. Chao Gao, Baodong Liu, Ming Li
THE SEISMIC PROOF AND SHOCK ABSORPTION OF HI-TECH FACTORY INSTALLED HYDRAULIC DAMPER ................................. W.P. Sung, M.H. Shih, C.L. Chen
THE VIBRATION ANALYSIS STUDY OF BRAKE SYSTEM IN A PLANETARY GEARBOX ................................. H.B. Yin, Q.K. Xing
Theoretical and experimental researches on joint-torque of the upper limbs synergistically manipulating a steer wheel ........................................................................................................................................ Shimin Wang, Hongwei Wu
THEORETICAL AND NUMERICAL ANALYSIS OF AN UNSYMMETRICAL ROTOR WITH TILTING PAD JOURNAL BEARINGS ................................. X.C. Gong, D.Q. Cao
TOPOLOGY OPTIMIZATION OF DAMPING MATERIAL LAYOUT TO ENHANCE ENERGY DISSIPATION OF PLATES ................................. Ronglu Xie, Zhimin Han, Ling Zheng, Adel El-Sabbagh
USING ENERGY CONCEPT ON ESTIMATING SEISMIC RELIABILITY OF BUILDINGS UNDER NEAR-FIELD MOTIONS ................................. Haiming Zhang, Weijian Yi
VIBRATION AND POWER FLOW ANALYSIS OF PERIODICALLY REINFORCED PLATES WITH ARBITRARY BOUNDARY CONDITIONS ................................. H.A. Xu, W.L. Li
Vibration Control in A Kagome Based High Authority Shape Morphing Structure ................................. Xu Guo, Jun Jiang
Vibration control of rotating plate by using self-sensing active constrained layer damping ................................. Z. Xie, P.K. Wong, I.I. Chong
VIBRATIONAL CHARACTERISTICS OF PIPING SYSTEM IN AIR CONDITIONING OUTDOOR UNIT ................................. Waleed F. Faris, S.K. Loh, Mohd Hamdi Abd Shukor, W.M. Chin
Visco-elastic damping material performance analysis in whole-spacecraft passive vibration isolation systems .......... Yongwei Ci, Bo Fang, Lijun Tan, Wen-Hu Huang

Control Theory and Application
A NOVEL ADAPTIVE FEEDFORWARD CONTROL ALGORITHM FOR ACTIVE VIBRATION ISOLATION ............... L. Zhang, Y. Wang, S.H. Shi
ACTIVE CONTROL OF A CANTILEVER BEAM USING A POINTWISE FIBER BRAGG GRATING DISPLACEMENT SENSOR SYSTEM ................................. K.C. Chuang, C.C. Ma, H.T. Liao, C.H. Wang
ADAPTIVE CONTROL FOR DUAL-ARM SPACE ROBOT WITH EXTERNAL DISTURBANCES VIA NEURAL NETWORK ................................... Z.Y. Chen, Li Chen
AN IMPROVED HOMOTOPY ANALYSIS METHOD FOR HOMOCLINIC SOLUTION OF A NONLINEAR OSCILLATOR ................................................................. D.Q. Cao, Y.J. Ma
ANALYSIS OF STICK-SLIP MOTION IN DRY FRICITION SYSTEM ........................................ Z.S. Liu, D.S. Qian
Comparison Study of Iterative Learning Control Algorithms ...................................................... P.R. Ouyang
Controller Design and State Estimation with a KALMAN-Filter for a High-Speed MAGLEV Vehicle ................. Reinhold Meisinger, Guangwei Shu, Gang Shen
Design and Realization of Fuzzy Control System for Textile Mill’s Air-Conditioning Based on MSP430 .................... Fuzhuan Wu, Bingxin Wu
Dynamic Analysis Program Planted in Three Single-Step Direct Integration Methods such as SC1-ρ Method .............. Huiping Shao
ESTIMATIONS ON ATTRACTORS AND THEIR BASINS OF ATTRACTION IN TWO-NEURON HOPFIELD NETWORKS ........................................................... H.L. Shang
Explicit Traveling Wave Solutions for 3D Ginzburg-Landau Equations ......................... S.J. Lü, C. Wang, Qishao Lu
GENETIC ALGORITHM CONTROLLER DESIGN WITH MULTI OBJECTIVES FOR ACTIVE CONTROL SYSTEMS INVOLVING TIME-DELAY ..................................... X.M. Xue, Q. Sun, L. Zhang, X.H. Wu
HOMOTOPY ANALYSIS APPROACH TO PERIODIC SOLUTIONS OF A NONLINEAR JERK EQUATION ............... S.D. Feng, Li-Qun Chen
LMI-BASED APPROACHES TO GENERALIZED SYNCRHONIZATION OF COUPLED DUFFING OSCILLATORS ............................................................. S.Y. Xu, Y. Yang
Modeling for Hypersonic Vehicle Control ............................................................... Qingkai Wei, Xun Huang
Nonlinear vibration decentralized control algorithms for complicated civil structures with/without soil-structure interaction ........................................................................ Hui Li, Jian Wang
NUMERICAL METHODS FOR TWO VARIABLE-ORDER MODIFIED ANOMALOUS SUBDIFFUSION EQUATION WITH A NONLINEAR SOURCE TERM ............ F. Liu, S. Shen
Structure of Principal Eigenvectors and Genetic Diversity .................................. Fengxin Chen, Peter W. Batesu
The analysis of the flight dynamics of aircraft after the icing .................................. Huan Pan, Jianliang Ai
THE GENERALIZED HYPERBOLIC PERTURBATION METHOD FOR HOMOCLINIC SOLUTION OF NONLINEAR AUTONOMOUS SYSTEMS .................................. Y.Y. Chen, S.H. Chen
Two-Link flexible manipulators trajectory tracking using composite controller design ........................................ M. Mosayebi, M. Ghayour

Dynamics and Control of Multi-body Systems
A PASSIVE DYNAMIC WALKING MODEL WITH COULOMBIC FRICTION AT THE HIP JIONT .................. W.H. Guo, Qi Wang, Tianshu Wang
Application of Refined Vehicle Model Based on Multi-body System Dynamics in Coupled Vibration on Vehicle-Bridge system ......................................................... F.T. Bai, S.A. Cui, B. Zhu
